

4th Quarter 2017 Minimum Company Standards Guide

Ladders:

1. Utilizing the room in the training tower with the fireplace, effect a rescue of a downed victim using the ladder. I.e. roll the downed victim onto the ladder, and use it as a lever to lift them, and pull them out of the window.
2. Deploy various ladders simulating buildings and obstructions next to the deployment area.

Self Contained Breathing apparatus

1. Don PPE and SCBA in under 2 minutes
2. Review and recite knowledge mastery of: HUD, Pressure regulators and indicator(s), RIC/UAC connection, EBSS connection (Reference NFPA 1981, ch. 6&7)

Fire Fighter Safety and Survival

1. Utilizing full PPE, and aerial device, and the rogers pack, rescue the dummy from the 3rd floor of the tower
2. Review SOP 507 Rapid Intervention and Firefighter Survival
3. Utilizing full PPE, have each member conduct a Mayday report following SOP 507

Fire Suppression

1. Review and discuss SOP 512 Flue Fire Response
2. Setup and flow foam using the various application techniques (i.e. roll on, rain down, bank down)
Also discuss various percentages for polar and non-polar solvents

1410 Evolutions

1. Connect to a hydrant and flow an attack line with foam, and a master stream
2. Forward Lay from the hydrant to an engine and flow the master stream, also supply water to an aerial device and flow that as well
