

Rogers Fire Department Cardiac Arrest Registry

January 2011
Utstein Style Template Showing Data on Cardiac Arrests
4 Patients

Description	RFD Totals	%
Total Number of Cardiac Arrests with Resuscitation Efforts	2	50%
Total Number of Cardiac Arrest with Resuscitation Efforts: Cardiac Etiology	1	25%
Total Number of Cardiac Arrests with Resuscitation Efforts: Non-Cardiac Etiology	1	25%
Total Field ROSC, AC Event:	0	0%
Total Field ROSC Regardless of Etiology	0	0%
Rhythm on Arrival: Non-Ventricular Group, Cardiac Arrests with Resuscitation Efforts (Asystole/PEA), AC Event	1	25%
Rhythm on Arrival: Ventricular Group, , Cardiac Arrests with Resuscitation Efforts (VF/Pulseless/VT), AC Event	0	0%
Field ROSC from VF, AC Event	0	0%
ETT successfully placed/Cardiac Arrest with Resuscitation Efforts	2 ¹	100%
Intravenous/Intraosseous Access/Cardiac Arrest with Resuscitation Efforts	2	100%
Response Time to the Scene < 5 minutes (Responding to Arrival) on Cardiac Arrest with Resuscitation Efforts	2 ²	100%
VF, Bystander CPR	0	0%
Site of Cardiac Arrest Regardless of Etiology, Regardless of Resuscitation Efforts (Home)	3	75%
Site of Cardiac Arrest Regardless of Etiology, Regardless of Resuscitation Efforts (Nursing or Care Facility)	1	25%
Cardiac Arrest, Female (Regardless of Resuscitation Efforts)	1	25%
Cardiac Arrest, Male (Regardless of Resuscitation Efforts)	3	75%

¹ Both ETT placement and IV/IO access may reflect circumstances where resuscitation was halted. ETT placement does also not count times a King Airway is utilized.

² Includes rural Benton County responses
