

# Rogers Fire Department Cardiac Arrest Registry

**August 2010**  
**Utstein Style Template Showing Data on Cardiac Arrests**  
**5 Patients**

| <b>Description</b>                                                                                            | <b>RFD Totals</b> | <b>%</b> |
|---------------------------------------------------------------------------------------------------------------|-------------------|----------|
| Total Number of Cardiac Arrests with Resuscitation Efforts                                                    | 2                 | 40%      |
| Total Number of Cardiac Arrest with Resuscitation Efforts:<br>Cardiac Etiology                                | 1                 | 20%      |
| Total Number of Cardiac Arrests with Resuscitation Efforts: Non-Cardiac Etiology                              | 1                 | 20%      |
| Total Field ROSC, AC Event:                                                                                   | 0                 | 0%       |
| Total Field ROSC Regardless of Etiology                                                                       | 0                 | 0%       |
| Rhythm on Arrival: Non-Ventricular Group, Cardiac Arrests with Resuscitation Efforts (Asystole/PEA), AC Event | 1                 | 20%      |
| Rhythm on Arrival: Ventricular Group, Cardiac Arrests with Resuscitation Efforts (VF/Pulseless/VT), AC Event  | 0                 | 0%       |
| Field ROSC from VF, AC Event                                                                                  | 0                 | 0%       |
| ETT successfully placed/Cardiac Arrest with Resuscitation Efforts                                             | 1                 | 20%      |
| Intravenous/Intraosseous Access/Cardiac Arrest with Resuscitation Efforts                                     | 1                 | 20%      |
| Response Time to the Scene < 5 minutes (Responding to Arrival) on Cardiac Arrest with Resuscitation Efforts   | 2 <sup>1</sup>    | 40%      |
| VF, Bystander CPR                                                                                             | 0                 | 0%       |
| Site of Cardiac Arrest Regardless of Etiology, Regardless of Resuscitation Efforts (Home)                     | 5                 | 100%     |
| Site of Cardiac Arrest Regardless of Etiology, Regardless of Resuscitation Efforts (Nursing or Care Facility) | 0                 | 0%       |
| Cardiac Arrest, Female (Regardless of Resuscitation Efforts)                                                  | 2                 | 40%      |
| Cardiac Arrest, Male (Regardless of Resuscitation Efforts)                                                    | 3                 | 60%      |

<sup>1</sup> Both ETT placement and IV/IO access may reflect circumstances where resuscitation was halted. ETT placement does also not count times a King Airway is utilized.

<sup>2</sup> Includes rural Benton County responses
