

Rogers Fire Department Cardiac Arrest Registry

June 2010
Utstein Style Template Showing Data on Cardiac Arrests
6 Patients

Description	RFD Totals	%
Total Number of Cardiac Arrests with Resuscitation Efforts	6	100%
Total Number of Cardiac Arrest with Resuscitation Efforts: Cardiac Etiology	6	100%
Total Number of Cardiac Arrests with Resuscitation Efforts: Non-Cardiac Etiology	0	0%
Total Field ROSC, AC Event:	2	34%
Total Field ROSC Regardless of Etiology	2	34%
Rhythm on Arrival: Non-Ventricular Group, Cardiac Arrests with Resuscitation Efforts (Asystole/PEA), AC Event	4	68%
Rhythm on Arrival: Ventricular Group, Cardiac Arrests with Resuscitation Efforts (VF/Pulseless/VT), AC Event	2	34%
Field ROSC from VF, AC Event	1	50%
ETT successfully placed/Cardiac Arrest with Resuscitation Efforts	6 ¹	100%
Intravenous/Intraosseous Access/Cardiac Arrest with Resuscitation Efforts	6	100%
Response Time to the Scene < 5 minutes (Responding to Arrival) on Cardiac Arrest with Resuscitation Efforts	3 ²	50%
VF, Bystander CPR	0	0%
Site of Cardiac Arrest Regardless of Etiology, Regardless of Resuscitation Efforts (Home)	6	100%
Site of Cardiac Arrest Regardless of Etiology, Regardless of Resuscitation Efforts (Nursing or Care Facility)	0	0%
Cardiac Arrest, Female (Regardless of Resuscitation Efforts)	2	34%
Cardiac Arrest, Male (Regardless of Resuscitation Efforts)	4	68%

¹ Both ETT placement and IV/IO access may reflect circumstances where resuscitation was halted. ETT placement does also not count times a King Airway is utilized.

² Includes rural Benton County responses
