

2013 ROGERS FIRE DEPARTMENT ANNUAL PREVENTION PLAN

The 2013 Rogers Fire Department Annual Prevention Plan (APP) serves to inform personnel of the prevention activities during the 2013 calendar year. Areas printed in red on the APP are shown to involve other divisions. The APP was developed in conjunction with the 2013 Rogers Fire Department Annual Training Plan (ATP). The APP will systematically address prevention needs in the form of building inspections, hydrant inspections, and community education.

Through policies and the APP, assurance will be made that programs are ingrained into the Department as the way we do business. As a result, the Department will mitigate risk-related events prior to their occurrence providing for a safer community to live, work, and visit. In 2013, the following four areas will receive a greater focus:

1. Reaching the non-English speaking population in the community
2. Inspecting 100% of medium and high risk occupancies
3. Delivering seasonal public service announcements (PSAs)
4. Delivering exceptional core prevention programs
 - a. K-5 Fire Prevention Education
 - b. CPR 5th & 9th Grade
 - c. Junior Fire Marshal's Program

Every attempt will be made to adhere with the APP as the year progresses. However, the APP compliments the ATP, and therefore must be fluid and flexible. The APP is subject to change at the discretion of Department leadership.
